FA Academy

**Location:**  
St George's Park,  
Burton on Trent

**M&E Contractor:**  
Derry Building  
Services

**Completion:**  
June 2012

St George's Park is home to the National Football Centre, designed for training coaches, teams and studying sports medicine and science.

The centre is set to become a world-class facility, an educational hub, a national centre for the national game and a place where sport and business can interact. The site includes a replica Wembley pitch, a full-size covered artificial pitch, sports hall, changing rooms, sports medicine and science centre, a 5\* 142-bedroomed Hilton Hotel and a 3\* 86-bedroomed Hampton by Hilton Hotel, offices, conference, banqueting and training rooms.

Separate Trend systems manage all of the heating, ventilation and air conditioning for both the FA and Hilton, controlling everything from Guest Bedrooms to Pools, Sports Halls to Conference Centres, the critical information is delivered to the Facility Manager's desktop.
