Project:
Center Parcs

Location:
Woburn

M&E Contractor:
Derry Building
Services

Completion:
May 2014

IBMS installed the *TREND* Building Energy Management System to the Village Square, Plaza, Pancake House and five ancillary buildings.

The Plaza contains a seventy five bedroom hotel as well as a food store, conference facilities, two restaurants, a sports hall and sports bar, shops, a children's crèche and a state of the art 7,700m² spa with eight spa suites.

The Village Square building contains shops and restaurants overlooked by the leisure bowl with a bar on the first floor, as well as a 5,200m² sub tropical swimming paradise featuring a wave pool, lazy river and children's wet play areas.

The BMS controls all of the environmental conditions, including the pools, and monitors around 400 utility meters.
