

The Oracle

Project:
The Oracle

Location:
Reading

M&E Contractor:
Hammerson

Completion:
November 2014

Reading's premier shopping destination, at 76,200m² The Oracle hosts around 90 retail units, a 10-screen cinema and numerous riverside restaurants and cafes.

The project involved removal of four large Air Handling Units that served the Malls and adding controls for natural ventilation through façade louvres and roof vents.

Over sixty environmental sensors monitor weather conditions, air quality, mall temperature and protect against cold draughts to maintain comfort conditions with virtually no energy consumption.
