

WE ARE HIRING!

BEMS Commissioning Engineer

iBMS is a Building Energy Management System specialist established in 1994, working nationally from our offices near Nottingham and Cambridge. We are looking for a skilled and motivated person to join our small team but also be part of a large construction group, delivering major projects.

The role:

We are looking to recruit an experienced BEMS Commissioning Engineer, skilled in the implementation of TREND or TRIDIUM controllers.

You will be self-motivated, capable of managing your daily tasks and working under pressure to achieve completion deadlines.

The role will be site based and you will be expected to stay away from home when necessary.

We are an equal opportunities employer

Requirements:

- Electrically competent to work safely and carry out modifications to Control Panels without instruction
- Sound IT knowledge, including networking and IP addressing
- Thorough understanding of heating, ventilation & air conditioning plant
- Good knowledge of control components such as sensors, switches, valves and inverters
- Good knowledge of BEMS software (either TREND or TRIDIUM); ability to make amendments to software on-site
- Ability to amend Supervisor software on-site
- Able to effectively communicate at all levels with colleagues and clients

We offer:

- A competitive salary commensurate with your experience
- Choice of EV or PHEV company car or a car allowance
- Medical insurance
- Medical cash-plan covering optical, dental and other medical costs
- Personal Pension
- Life Assurance Plan
- 25 days annual leave – one extra day after every three years' service (up to a maximum of five extra days)

If you are interested in joining our team, please email your CV to controls@integratedbms.co.uk
