

Rushey Mead School

Project:
Rushey Mead School

Location:
Leicester

M&E Contractor:
MITIE Engineering
Services

Completion:
May 2013

IBMS worked in conjunction with G4S on a BSF Wave Two project which comprised remodelling and major rebuild of the campus to create a school for the future.

Rushey Mead School is a 1,500 pupil secondary school that specialises in Sports, Maths and Science and is located to the north of the Leicester city centre. The original school was a disjointed collection of buildings of various ages and states of repair.

The new design provides a campus solution that is linked by a series of covered spaces that both connect the new Sports and Teaching Blocks and create external teaching areas.

The *TREND* BEMS utilises the school's IT network to link all of the services and gives FM provider G4S a remote management facility.
